

AJINA AB

ARTIFICIAL INTELLIGENCE STUDENT

Results-driven final-year Artificial Intelligence student with strong skills in machine learning, data analysis, and model development. Experienced in building AI-driven solutions and improving project outcomes through analytical and problem-solving abilities. Seeking an entry-level role to apply technical expertise, contribute to innovative projects, and grow in a dynamic tech environment

PROJECTS

Vehicle Diagnosis and Damage Detection System(2025)

- Developed an AI-powered system to detect external and internal car damage using images, videos, and real-time OBD/ECU data.
- Implemented models to identify damage type, location, dent severity, and part-level issues.
- Built an automated repair cost estimation module with downloadable reports for insurance and users.
- Enhanced accuracy and workflow efficiency through integrated data processing and real-time diagnostics.

IoT-Based Automatic Rain Shield System (2024)

- Coordinated the planning and execution of marketing events, contributing to a 30% growth in event attendance.
- Implemented email marketing campaigns, resulting in a 25% increase in lead generation.
- Collaborated with cross-functional teams to create and update website content, enhancing user experience and brand perception.

INTERNSHIP

Social Media Hate Speech Detection System

Infosys springboard

Oct 20 - Dec 2024

- Contributed to the development of an AI model for detecting hate speech across social media platforms.
- Preprocessed and annotated text data to improve model accuracy and classification performance.
- Assisted in implementing NLP and machine learning techniques for sentiment and toxicity analysis.
- Collaborated on evaluating model outputs and enhancing detection reliability through iterative testing.

CERTIFICATIONS

- Cloud Computing – NPTEL
- Database Management Systems – NPTEL
- Python for Data Science – Great Learning
- Microsoft Azure Fundamentals – Microsoft
- Advanced Excel with Data Analytics – IIT Kanpur & MeitY
- Web Designing and Development – Prompt Infotech

EDUCATION

Bachelor of Artificial Intelligence

Bharathiyar university

Jul 2023 - Apr 2026

- Specialization in Machine learning.
- Thesis on "AI-Driven Strategies for Enhancing Digital Brand Presence and Customer Engagement."

Commerce In Computer Application

Marthoma high school

May 2021-Mar 2023

- "Relevant Coursework in Computer Applications and Information Technology."

SKILLS

- Machine Learning Algorithms
- Data Preprocessing & Feature Engineering
- Python Programming (NumPy, Pandas, Scikit-Learn)
- Deep Learning Basics (Neural Networks, CNNs)
- NLP & Text Classification
- Data Analysis & Visualization
- SQL & Database Management
- Cloud Computing Fundamentals (Azure)
- Problem-Solving & Analytical Thinking
- Multilingual Communication: English, Malayalam, Hindi
